Position Summary

We are currently seeking a Dental Lab Technician – Metal Framework to join our removable prosthodontics team.

This is an excellent opportunity for **both experienced technicians and motivated beginners (entry-level)** looking to specialize in metal-based dental prosthetics.

The ideal candidate will have experience fabricating metal frameworks for removable partial dentures (RPDs), though we are also open to training an entry level applicant with the right attitude and manual skills.

Key Responsibilities

- Fabricate metal frameworks for removable partial dentures
 - Perform casting, trimming, and polishing of metal components
 - Operate laser welding equipment for framework assembly and repair
 - Work from design specifications and ensure high standards of precision
 - Maintain a clean workstation and follow all lab protocols
-

Qualifications

Preferred:

- 5+ years of experience in a busy dental lab with metal framework specialization
- Strong proficiency in casting, polishing, and laser welding
- Ability to interpret dental design specifications with precision

Entry-Level Candidates:

- Basic understanding of dental lab procedures or hands-on technical aptitude
 - Willingness to learn, follow instructions, and maintain high-quality standards
 - Training will be provided on-site
-

Compensation & Benefits

- **\$20/hour** – Entry-level with training provided
 - **Up to \$27/hour** – For experienced technicians with 5+ years in a high-volume lab
 - **Health Coverage:** Co-pay Health Plan (medical, dental, vision)
 - **Retirement Plan:** Future access to the Company RRSP Retirement Plan
 - **Paid Time Off:** Vacation and holiday pay provided in accordance with policy
 - **Schedule:** Monday to Friday (day shifts only)
 - **Training:** On-site mentorship and technical instruction for entry-level candidates
 - **Additional:** Occasional overtime may be required
-
